EDUCATION

B.E Computer Science and Engineering
Kamaraj College of Engineering and Technology
2024 – 2028 | CGPA: 8.9

HSC
Kamaraj Matriculation Higher Secondary School
2024 – 86.5%

SSLC
Kamaraj Matriculation Higher Secondary School
2022 – 92.8%

SKILLS

Frontend

- HTML
- CSS
- JavaScript

Backend

- Java
- Python
- PHP
- C Programming

Database & Tools

- MySQL
- Firebase
- JDBC
- Swing GUI

LANGUAGES

- English
- Tamil

JOSELIN SORNAPRAISY R

Pre-Final Year CSE Student

Aspiring Full Stack Developer | Java Developer

ABOUT ME

A passionate and adaptable Pre-Final Year Computer Science and Engineering student eager to explore new technologies and continuously enhance technical skills. Strongly interested in Java Development, Full Stack Development, and Software Engineering with a mindset focused on innovation, problem-solving, and continuous learning.

EXPERIENCE & INTERNSHIPS

Student Intern – Web Development | Digisailor | Dec 2025

Worked on the development of an Attendance and Outpass Management System using Firebase Authentication, database integration, CRUD operations, and Geolocation API. Implemented responsive frontend components and secure student management features.

Student Intern – Full Stack App Development | Postulate Info Tech Pvt Ltd | Dec 2025

Completed foundational training in Flutter and Full Stack App Development while gaining exposure to mobile application architecture and frontend-backend integration.

Student Intern – Java Developer | ClinchEdge Workforce Technologies, Bangalore

Developed a Student Management System using Java, Swing GUI, and JDBC with CRUD operations, database connectivity, and desktop application functionalities.

Cisco Virtual Internships (Ongoing)

Focused on Artificial Intelligence and Data Analytics including Introduction to Modern AI, Apply AI: Analyzing Customer Reviews, and Data Analytics Essentials.

PROJECTS

Hospital Management System Android App – Developed using Java and XML for patient management and appointment scheduling.

Booking Management System – Built using PHP, HTML, CSS, and MySQL with CRUD operations and Admin Control features.

Online Shopping System – Developed using Python and Data Structures concepts with billing and cart management.

BMI Calculator – Python-based application to calculate BMI and categorize health results.

Vaccine Registration System – Console-based system using C language and file handling concepts.

Hospital Management System – Developed using Java, OOP concepts, and JDBC for managing patient records and appointments.

CERTIFICATIONS & PRESENTATIONS

- Cisco Networking Academy – Cybersecurity Essentials
- Infosys Springboard – Java Programming
- Infosys Springboard – Python Programming

Paper Presentations:

- Natural Language Processing (NLP)
- Fog Computing
- Brain Computer Interface (BCI)

Presented papers at National Level Symposiums.
